CERTIFICATIONS

CSS & Javascript Certification Course (03/2021 - Present)

I have completed this course from Udemy, where I have learnt various latest CSS properties and as well as complete javascript and their usage.

Python Bootcamp 2021 (03/2021 - Present)

I have achieved this certificate on completion of all the basics of the Python language.

Web Development Using MERN-stack (11/2020 - Present)

This certificate was issued after completing the full featured shopping cart website using complete MERN stack (AWS & heroku and various cloud services as well) from UDEMY.

PERSONAL PROJECTS

A shopping cart app using React, Redux, Node & MongoDB. (10/2020 - 02/2021)

- I have developed the super-fast, full featured shopping cart web application using ReactJs, Redux(for state management).
- NodeJs for developing the various API's, and MongoDB for the database management, JWT for the user authentication.
- Users can track their previous order history, edit their profile & last but not least can rate and review the products. Users can also purchase the products by making live payments, I have used Instamojo payment API for implementing that. Project Link - <https://my-amazonia.herokuapp.com/>
